## Summary

---

**Full-stack Typescript developer** with experience in Agile environments, delivering scalable web and mobile applications from architecture to deployment. Experienced in converting designs into interactive interfaces, developing real-time collaborative platforms and authentication systems, with expertise in monorepo architectures, CI/CD, automated testing, performance and accessibility enhancements.

## Skills

---

**Languages:** JavaScript, Typescript.

**Frontend:** React, React Native, Next.js, Expo, TailwindCSS, RSC, state management.

**Backend:** Node.js, Bun, Express, Hono, JWT, microservices, OAuth, REST APIs, websockets.

**DevOps:** Docker, Git, GitHub Actions, CI/CD.

**Databases:** MySQL, MongoDB, PostgreSQL, Redis, ORMs, query builders.

**Cloud & Platforms:** AWS EC2, Azure Functions, Cloudinary, Neon Postgres, Supabase, Vercel.

## Experiences

---

### Full-stack Developer

*December 2025 – February 2026*

#### Chingu – Voyage Program | Remote

- Led task estimation and backlog refinement with JIRA, participating in standups, sprint reviews and retrospectives.
- Built Confido, a full-stack monorepo based app with Next.js, Express, and PostgreSQL, implementing role-based interview questions.
- Converted Figma designs into frontend code, with a flashcard-style UI, role-selection, feedback, and summary views.
- Configured CI workflows with GitHub Actions, implemented API and database health checks, and enforced code quality with ESLint.
- Implemented unit tests for APIs and frontend components using Vitest, automated with pre-commit hooks and CI workflows.
- Team's Github repo: [github.com/chingu-voyages/V59-tier3-team-32](https://github.com/chingu-voyages/V59-tier3-team-32).

## Projects

---

### Confido [Next.js, Node.js, Express, PostgreSQL]: A role-based interview questions generator

- Project is live at: [v59-tier3-team-32-web.vercel.app](https://v59-tier3-team-32-web.vercel.app). Github repo: [github.com/chingu-voyages/V59-tier3-team-32](https://github.com/chingu-voyages/V59-tier3-team-32).

### Routana [React, Node.js, Express, Drizzle, Neon]: A personalized learning and goal-oriented roadmap generator

- Project is live at: [routana.onrender.com](https://routana.onrender.com). Github repo: [github.com/absterr/Routana](https://github.com/absterr/Routana).

### NodeAuth [Node.js, Express, Sequelize, bcrypt]: An authentication system for typescript

- Github repo is available at: [github.com/absterr/NodeAuth](https://github.com/absterr/NodeAuth).

### Scrib [Next.js, Bun, Drizzle, Neon, Yjs]: A real-time collaborative document and note-taking application

- Project is live at: [scrib-puce.vercel.app](https://scrib-puce.vercel.app). Github repo: [github.com/absterr/scrib](https://github.com/absterr/scrib).

## Education

---

Federal University of Technology, Minna | Minna, Niger  
Computer Engineering | 02/2026
